P. O. Box 259
ATLANTA, GEORGIA, U. S. A.

OUR PAMPHLET, "HOW TO MAKE TREE SEEDS GROW," 25c A COPY. ON REQUEST FREE WITH EVERY ORDER

# THE FOLLOWING CONDITIONS GOVERN ALL TRANSACTIONS:

THE PUBLICATION OF THIS LIST CANCELS ALL PREVIOUS QUOTATIONS.

TERMS: Cash. Thirty days net or 2% discount for cash within ten days from date of invoice to domestic book customers. We expect remittance with order or other arrangements, satisfactory to us, from our foreign customers. PRICES ARE QUOTED AND REMITTANCES ARE EXPECTED IN U. S. MONEY.

ALL SHIPMENTS travel at customer's risk. After having taken receipt of transportation companies we are not responsible for delays, losses or injury to shipment while in transit. Customer's redress is with transportation companies only.

PARCEL POSTAGE. Domestic rates are governed by zone tariff. Parcel postage into foreign countries is 14c per pound or fraction of pound. In addition to this a number of countries require payment of a surtax. Remittances should cover sufficient amounts for postage, etc.

NON-WARRANTY. We use the greatest care to have all our seeds, bulbs, plants, etc., pure and reliable, but they are sold without warranty and without any responsibility, express or implied, in respect to the crop. All sales are made under these terms. We are under no circumstances to be held responsible beyond the invoiced value of our goods and WE CANNOT, UNDER ANY CIRCUMSTANCES, CONSIDER ANY CLAIM AFTER THE GOODS HAVE BEEN PLANTED. All claims must be made on receipt of goods.

This list is published before the actual extent of some crops of trees and shrub seeds, offered in it, is known and our acceptance of orders is not a warranty for delivery but is subject to crop accidents and limitations of crops. Failing to receive the full amounts ordered from our collectors and growers we reserve the right to reduce proportionately all orders which have been booked or to fill orders in rotation while the supply lasts.

SEEDS WITH A REPUTATION FOR GROWING

IMPORTANT.-We exercise every care to send out tree seeds true to name. We cannot extend this guarantee to the result from sowing seeds of such varieties of conifers as "aurea, compacta, glauca, pendula, pyramidalis, violacea, etc." Our collectors are careful in gathering the seeds from trees showing the peculiarities of the variety but the seedlings will often revert to the mother form and as we have no way of testing the seeds as to their producing true to variety, we send them out without any warranty that they will come true any given percentage to variety.

# Trees and Shrubs

Half ounce, quarter pound, 25 lbs. at ounce, pound and hundred pound rates, respectively. No seeds invoiced for less than 15 cents. No invoice for less than 25 cents. Prices for larger quantities will be quoted by letter upon request.

We are using the following abbreviations:

"e" means evergreen, "d" means deciduous.
"t" means tree, "s" means shrub.
"v" means vine or climber.
"db" means seed in natural hull.

means clean seed.

Example: "et" stands for evergreen tree. OZ. LB. dt ACACIA armata, Kangaroo Thorn

#### NEPONSET WATERPROOF PAPER POTS are a great

and almost indispensable help to the grower. We supply them. Write for complete price list and other information.

#### PRACTICAL SEED TESTERS

It is of importance that tree seeds and other seeds be tested before planting. Our testers are dependable and very simply operated.

Small size, 6x9 in., \$4.00 net, f. o. b. here, no charge for packing. Large size, 9x13 in., \$5.00 net, f. o. b. here, no charge for packing.

#### **ULMUS PUMILA**

#### Chinese or Siberian Elm

Tree growing from 40 to 50 feet tall with a trunk 4 to 8 feet in girth. The bark is rough and deeply corrugated. The branches are spreading and ascending, forming a bushy crown. Under cultivation it grows rapidly and makes a neat shapely tree. Leaves ovate to ovate-lanceolate 3 to 12 cm long, acute at the apex, nearly equal at the base, thin, dark-green above, pubescent when young, underneath, regularly and simply or doubly toothed. Flowers short-stalked, in crowded clusters, 4 to 5 parted with yellow anthers, appearing in spring. Fruit obovoid, notched deeply at the apex; nutlet central, reaching close to the base of the notch. Fruit ripens often soon after leaves are open.

#### NOTES:

This species is commonly used by the Chinese in the alluvial plains, for village trees, and for planting between fields, particularly along irrigation ditches. The trees grow rapidly and attain diameters at breast-height of 20 inches. The wood is much used for furniture, some breast-neight of 20 inches. The wood is much used for furniture, some for building construction and for the construction of cart-frames and cart-beds. It is used as a grave-tree planted in groves and attaining quite good form in altitudes of 4,500 feet. Apparently few other trees thrive there. It is also noted as planted along dry roadsides where it is cut back almost every year for fuel. It then takes on a characteristic shrubby form which may confuse its identity with the tree. It will be treed to the construction of t stand quite dry conditions but requires a deep pervious soil for a good development of its roots.

Ready in July. 40c per oz.; \$3.50 per lb.

#### ULMUS PARVIFOLIA

#### Chinese Elm

Tree, rarely up to 75 feet with a trunk 4½ to 7 feet in girth. Bark is gray, smooth. On old trees it peels off in roundish patches showing the brown inner bark. On young trees it is merely scaly. Branches are numerous and slender and form a rather broad, rounded crown. It grows often slowly. Leaves rather leathery, ovate to obovate or oblong, acute or somewhat obtuse, slightly oblique at the base; simply serrate, shiny green, gabrous above, pubescent beneath, when young; usually glabrous at maturity, 2 to 5 cm long. Petiole is very short. It flowers in September and fruit ripens in October or November. Flowers clustered, fruit oval to elliptic, emarginate at apex with lutlet in the centre of the wing, 9-13 mm. long.

#### NOTES:

A much more beautiful and graceful tree, particularly for ornamental purposes, than Ulmus pumila. The branches are long and graceful with a drooping effect at the ends which make the perfect wase form used as a descriptive term for elms. The branches are thin and long and swing in the wind very gracefully. The foliage has a lacy and fine textured appearance. It requires a deep soil, thriving best in a alluvium or loess, where root development to considerable depth is rendered possible.

Ready in December. 30c per oz.; \$2.80 per lb.

# Seeds of Palms, Tropical and Subtropical Plants

IMPORTANT: Palm seeds should be cared for by the planter as soon as possible after ripening and gathering, and as many kinds listed by us must be shipped to us over long distances, orders should be in our hands as early as possible to have best care.

# Roots and Seeds of Medicinal Plants

Arrangements with very reliable growers permit us to offer the following list of high grade Medicinal Roots and Seeds for propagation at very attractive prices, which are not subject to any discount. We are not growers ourselves. For roots and seeds of economic plants not listed or for large quantities we can quote on direct inquiry.

Information regarding cultivation of Ginseng, Goldenseal and other herbs may be had by applying to United States Department of Agriculture, Washington, D. C., which issues bulletins on these subjects.

#### SEEDS

	100	500	1,000	10,000	Oz.	Lb.
(Panax quinquefolium)	.50	1.80	3.00	27.50	•••••	
(Hydrastis canadensis)	.35	1.40	2.00	18.00	·	
Pink root(Spigelia marilandica)	.40	1.60	2.40		•••••	
Belladonna(Atropa belladonna)	•	•••••	. ····	••••••	1.00	•
Stramonium (Datura stramonium)	•••••		*******		.30	2.40

We pay postage on domestic orders for these seeds when accompanied by cash.

#### ROOTS

#### GINSENG (Panax quinquefolium)

				10	100	500	1,000

# Woodsgrown Trees and Shrubs

We have for many years supplied woodsgrown trees and shrubs in very considerable quantities. This material is splendid value and is suitable for growing on or for landscape effects.

	Size,	Per	Per
	Feet	100	1.000

IF YOU GATHER ANY PALM, ETC., SEEDS WE SHOULD BE INTERESTED IN YOUR OFFERS.

#### DISINFECT YOUR SEEDS-CONTROL "DAMPING-OFF" With

SEMESAN acts as an antiseptic that either kills or re-I tards the development of disease-producing bacteria and fungi which subsist on seeds Makes Seeds Healthy and plants. This one anti-septic, SEMESAN, is suffi-

cient for all forms of "damping-off" disinfection, whether it be applications to seeds, or soils, seedlings and cuttings.

A single application of liquid SEMESAN to control "damping-off" costs about 1½c per 10 square feet of dis-infected area. Seed treatment is still cheaper, costing only from ½c per pound of seed for liquid applications to a maximum per pound for dust treatments. Write us for booklets describing SEMESAN.

Sold in tin containers—2 oz., 50c; 8 oz., \$1.60; 1 lb., \$2.75; 5 lbs., \$13.00; 25 lbs. can, \$62.50.

and transportation charges.

Wilmington, Del.

#### USPULUN

(The Bayer Co., Inc.)

vitalizes seedlings and cutting by removing fungi from seed and soil. Seed treated with Uspulun can be stored away for a length of time (but not indefinitely) without harm to the seed.

#### DIPDUST

is easily applied and inexpensive to use. Seeds, like humans, are susceptible to disease. One cannot always see disease, but can discern the results in poor germination, weak, spindly plants and low yields of poor quality crops. fecting tree seeds, flower seeds, vegetable and field seeds with DIPDUST before planting helps to prevent destructive diseases that cost growers many millions of dollars annually.
